

# INTRODUCING THE FAMILY APP

♥ Updates on your child's day - straight to your pocket ♥

Available on mobile and online, Famly is a new app that we'll be using to stay in touch and keep you updated on your child's development at our setting. Here's what it will mean for you:

Famly will give us time back to spend with your little ones. The fully encrypted, GDPR-compliant app allows us to access important child information quickly and when your child is sick or on holiday, you can let us know with the click of a button.

Your login will have a personalised feed where we can update you with pictures, videos, observations and announcements throughout the day. With these real-time updates, straight to your pocket, you'll get to stay involved in the child's day.

We can send messages to each other in-app too, allowing us to keep you updated about everything big and small. You can comment and like posts on your news feed too, giving us feedback and helping us understand what you want to see more of.
